

## who we are

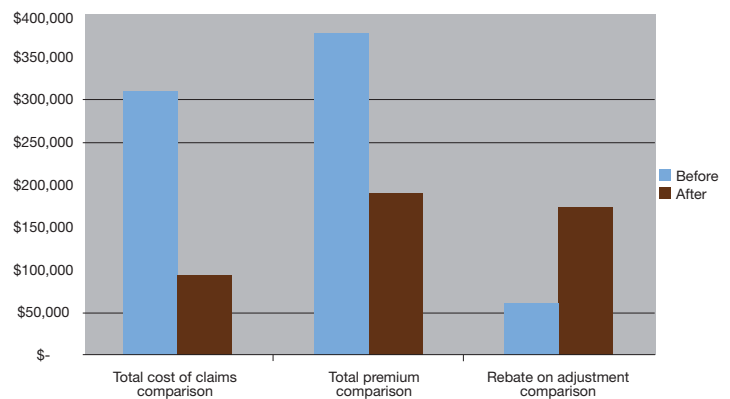

Workers Compensation is a complex field and one of the most misunderstood costs to control for a business. That's why organizations turn to On Track Injury Consulting (OTIC).

We have the expertise and experience to provide your company with a flexible, cost effective solution to manage your workers compensation programs.

## how we are unique

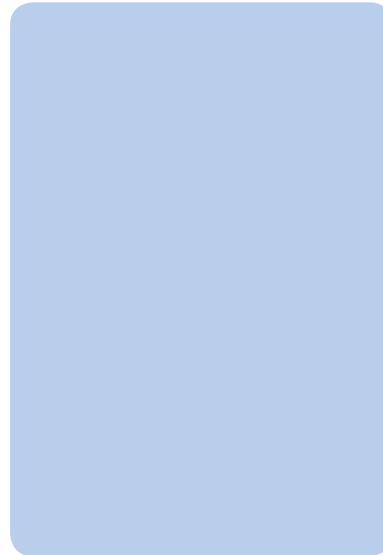

- 20 years experience in the Workers Compensation Industry
- Experienced in dealing with multiple/national locations
- We respond to injuries/incidents immediately
- This early intervention minimizes lost time injuries (LTI's)
- Our services are not used to calculate your premiums. Let us show you how we are cash flow positive
- As an outsourced function you have access to a multidisciplinary professional team with experience in all industries including
  - o Corporate
  - o Logistics
  - o Retail
  - o Manufacturing
  - o Construction
  - o Health care

## 'On Track Injury Consulting uses early intervention to create positive outcomes'

Statistics from WorkCover indicate that a claim reported two or three weeks after the incident have 13% higher costs than those reported immediately; at four weeks the cost increase to 25% more; at seven to eleven weeks 34% and at 12 weeks 91% more than those reported immediately.

At On Track Injury Consulting we see this in practice every day. Workers who receive early support in their claim spend less time off work on workers compensation. From this perspective, providing support immediately following the injury is advantageous to workers and employers.

## how we help you

We have a consultative process working with you and your people. We will broaden your education, skill and train your team to use their abilities in preventing and managing workplace injuries. This will assist you to achieve the optimal outcome in your Workers Compensation strategies.

Workers Compensation is a complex field. Let us show you how we can become part of your team, just another department, only outsourced.

Happy workers don't become long-term claimants. Employer-employee relationship is critical in achieving a timely and durable return to work. We can assist you with building a culture where workers feel valued.

By employing an outside company of experts you are demonstrating that your employees are valued partners and their wellbeing is important to your business enterprise.
